I know this request sounds totally ridiculous at first, but I need it for technical reasons. I would like a custom scaling command like \big, \Big, \bigg, \Bigg, but one that corresponds to "normal size".We could call it \normalscaling or something like that. Importantly, it should exhibit the same behaviour as the other scaling commands, so e.g. \normalscaling. should yield nothing, while ...

### How to make a \big-type command for "normal" size
