IFMA Research: FM Reports, Survey Results, and Forecasts ...

Facility Management Metrics are the foundation of facility management because many are performance indicators that reflect a performance measure per unit. Lagging metrics are useful to tell how well our organization/facility performed while leading metrics are useful to forecast the likely trend (or to set goals for performance). Metrics are also used for facility benchmarking because they can be compared between different facilities and organizations.

Understanding Facility Management Metrics | Facility Issues

To avoid that problem, a broad survey of similar facilities built at similar times was conducted. This information was given to provide additional context, not to be used as a strict comparison. Because future facilities will be built to address distinct business and design needs, the benchmarking study identified “influencing factors” that ...
