Cat dissection guide covers the circulatory, digestive, respiratory, urinary, and reproductive systems. Dissections are performed over a 5-8 day time frame with a final assessment. The lab guide

Cat Dissection Guide - The Biology Corner

Anatomy and Physiology. Pericardium: the membrane enclosing the heart, consisting of an outer fibrous layer and an inner double layer of serous membrane. Anterior Vena Cava: The superior vena cava (also known as the cava or cva) is a large diameter, yet short, vein that carries deoxygenated blood from the upper half of the body to the heart's right atrium.

Cardiovascular System - cat dissection website

When dealing with the circulatory system, it is best to think of the vessels like a road map, one vessel leads to another with branches into these two vessels...etc. The cats have been injected with colored latex to make identifying the vessels easier. The arteries will have a pink color and the veins will have a blue color.

CAT DISSECTION A LABORATORY GUIDE

Chapter 12: Circulatory System. This chapter is divided into three main sections: the structure of the heart which includes a dissection, naming of human vessels which includes a lab test, and finally the dissection of the cat to identify vessels. Part 1: The Structure of the Heart. Guided Notes: Heart, Cardiac Cycle, Major Vessels

Anatomy & Physiology - The Biology Corner

One of the first tasks of the cat dissection is to identify the vessels of the cat. We remove the pericardium from the heart and carefully tease away the connective tissue to reveal the arteries that leave the heart. If you follow the aortic arch, the first main vessel of the cat is the brachiocephalic artery.

Cat Vessels

What does the respiratory system look like? Friday, 2/7 Procedure - locate the xiphoid process on the cat and the top of the sternum - cut on the left and right sides of the sternum to remove it - cut the cartilage of the ribs to get into the respiratory cavity - remove the trachea along with the heart and lungs. Materials - cat ...
