The Enterprise Solution Architect becomes a member of the project Solution Architects team and is responsible for the system integration architecture where the solution requires integration between enterprise systems as well as be responsible for providing future state system architecture guidance to help the project Solution Architect make decisions on which systems to commit to using in the solution.

Enterprise Architect vs Solution Architect - dbj(org);
Enterprise architects are best known for taking the "50,000-foot view" of a project. A solutions architect zones in on the details. Solution architecture concerns itself with the technical decisions involved in organizing and implementing the solution. It then compares them to business outcomes.

Enterprise vs. Solution vs. Infrastructure: Understanding ...
Enterprise architecture is just solution architecture, but at a larger scale: 'the enterprise'. All these kinds of architectures are just a matter of scale. As the scale increases, the details become harder to manage because there are more of them. And it's more than just 'design for the issue at hand'.

Technical vs. solution vs. enterprise architecture: a ...
Build on your strategy. One aspect of being an Enterprise Architect that borders as much on voodoo as experience is creating a technical strategy for your organization. This involves everything from evaluating the future needs of your customers to trying to decide which technology wave to ride and which to let pass by.
