Vox Manuals - Korg
The NT50H-G2 Night Train 50 incorporated the traditional Vox "Tone Cut" control. The tone control was located within the phase inverter circuit. A.005 uf capacitor allowed only the treble frequencies from opposing sides of the phase inverter to reach the tone control. The tone control blended these "out of phase" treble frequencies together.

The VOX Showroom - Vox NT50H-G2 Night Train 50 Amplifier Head

The NT50H-G2 Night Train utilizes two EL34 power tubes to generate 50 watts of pure tube tone. The footswitchable Bright and Girth channels cover the complete tonal spectrum from traditional VOX chime to modern high-gain overdrive, with the Thick switch providing an additional gain boost for some added grit.
